PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience across the software development lifecycle in Agile teams: documenting technical decisions and issues, tracking and resolving defects, and building AI-powered content tools for marketing agencies. Strong written English and attention to detail.

TECHNICAL SKILLS

Testing & QA:	Playwright (browser automation), GitHub Actions (CI lint, type-check, build), Postman, SQL
Languages:	Java, Python, TypeScript, JavaScript, C# (Unity), HTML, CSS, OOP
Frameworks & Libraries:	Next.js, React, Node.js, Express.js, Prisma ORM
Databases:	PostgreSQL, Redis, SQL
Other:	Notion (task tracking), Agile/Scrum, technical documentation, Docker, GitHub Actions, Git, Linux, Bash, Unity 6, Blender, MS Office

PROJECTS

OreanStudio (Orean 360 Platform)

2025 – 2026

Technologies: Next.js, Node.js, TypeScript, ESLint, Express.js, PostgreSQL, BullMQ, Redis, Docker, GitHub Actions, Kubernetes, Terraform, Helm

- Built and shipped a social media automation SaaS platform, collaborating in a 6-member Agile/Scrum team across the full development lifecycle, with Notion for task tracking.
- Documented the platform's architecture, design decisions and resolved issues in a technical case study, recording each issue by symptom, root cause and fix.
- Contributed to approval workflows (post review, comments, status updates, audit logs) for a multi-platform content scheduling tool.
- Diagnosed and resolved 23 documented issues across two projects, including unprotected dashboard routes and an exposed API key (revoked and purged from git history).
- Built a GitHub Actions CI workflow that runs linting, type-checking and Docker build verification on every pull request.

GEO Engine (Zero-Cost LLM Pipeline)

2025 – 2026

Technologies: Python, Playwright, Firecrawl, Qwen2.5, vLLM, PyTorch, Unsloth, Docker Compose, WSL2, Modal

- Built a session manager that injected authenticated session cookies into Playwright headers, with 10-25 second request delays to stay within rate limits.
- Cleaned and validated the scraped data (length filter, deduplication, spam removal, PII stripping) down to 374 records, split 299/37/38 into train, validation and held-out test sets.
- Fine-tuned Qwen2.5-7B-Instruct with LoRA on a free Colab T4 GPU and served it with vLLM on Modal, within free credit tiers.

3D Interactive Arcade Simulator

2025

Technologies: C# (Unity), Unity 6, Blender

- Shipped a LEGO-themed first-person arcade simulator with 3 mini-games; identified and logged defects across physics edge cases through structured playtesting of collision behaviour across all game modes, in a 3-member team.

CERTIFICATIONS

IBM SkillsBuild: [Cloud Computing Fundamentals](#)

Cisco: [Python Essentials 2](#)

Boot.dev: [Docker](#), [Git](#), [Linux](#), [SQL](#), [Python](#), [OOP in Python](#)

DataCamp: Java, Java OOP

LANGUAGES

English: Fluent

Sinhala: Native

EDUCATION

Informatics Institute of Technology (IIT) – BSc (Hons) Computer Science · Year 3 of 4 · Expected graduation: 2028

Modules – Object-Oriented Programming (Java/Python), Databases, Client-Server Architecture, Web Development

Kingswood College – A/Ls: Applied Mathematics & Pure Mathematics (2021 – 2023)
